1.1 Database Planning

We can Divided our project into Following Sections.

1.1.1 Mission Statement

The Mission statement of our project is to Create a project that wil help people to find different anime(subbed and dubbed version) and people will be able to store data of the watched anime.

1.1.2 Mission Objective

“**Animepedia** is a web-based **system** that will handle and maintain all the record of anime. Through our product people can easily find the seasons of anime they want to watch. Our system will be user friendly so that people can easily interact with it. Our system will manage user record and history.

As our project is web-based for we will create website using:

Technologies and languages used:

HTML(Atom)

CSS(Atom)

JAVASCRIPT(Atom)

BOOTSTRAP(Atom)

Back-end:

PHP or Node js

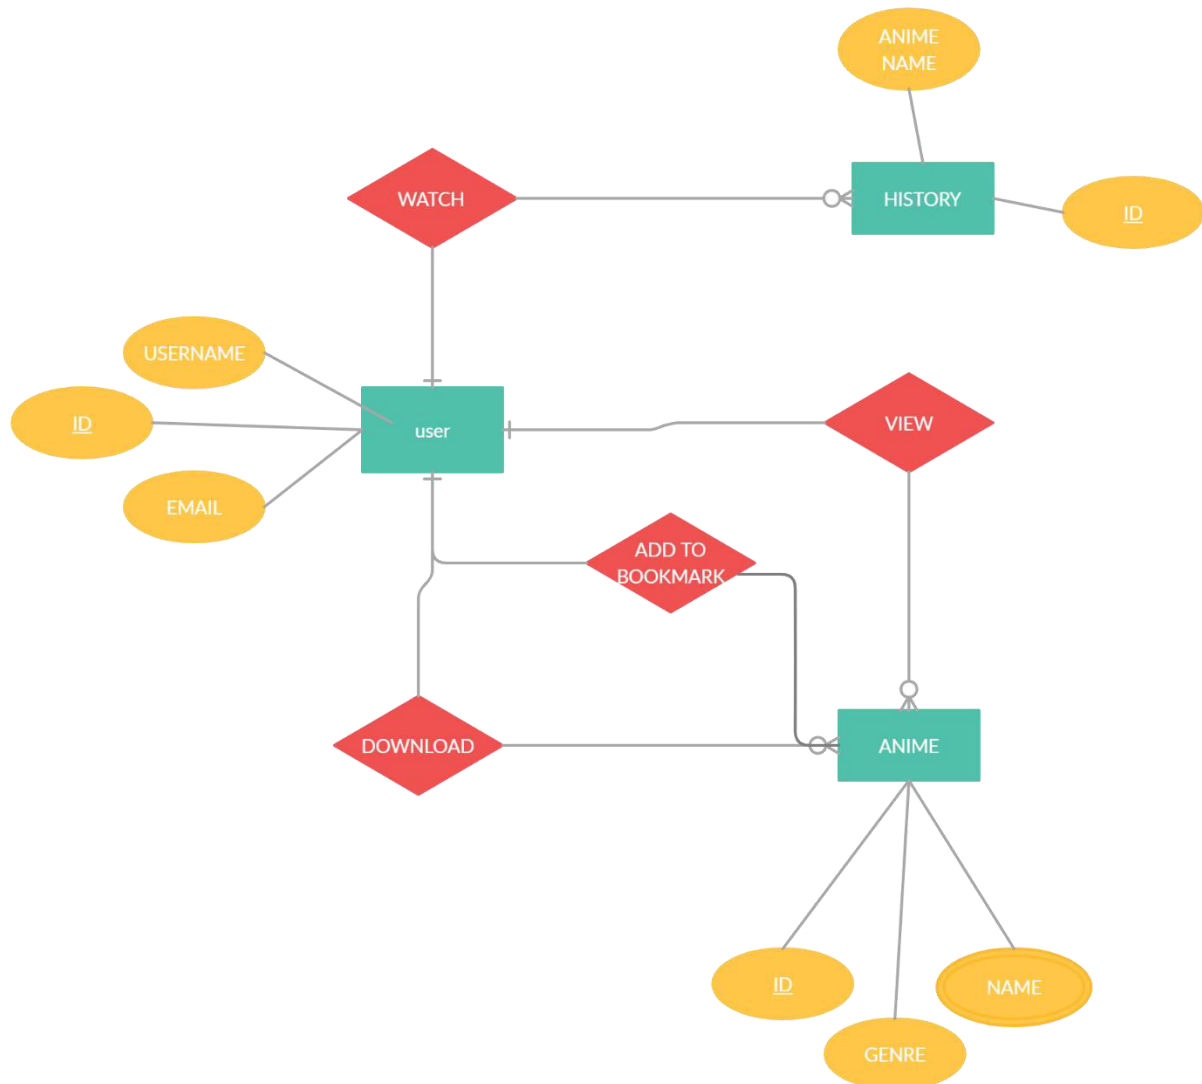

For Database we will use XAMPP Server PHP myadmin

1.1.3 Mission Objective of Database

Mission Objective of the database is

- We can add , delete , create and update data of different anime in our site
- The purpose of database is to provide consistency ,redundancy, security and dependency to the data
